

## SPECIALIZED PROGRAM MANAGEMENT

We help manage your costs by matching different and changing production volumes to the appropriate manufacturing location. For prototypes, clinical trials, or low-quantity programs, we use our highly flexible Northern California manufacturing facility. With minimal set-up times required and, guided by our engineering and production management staff, we can quickly respond to product ramp-ups or changes. As production normalizes or quantities increase, we can seamlessly transfer manufacturing to one of our higher volume facilities.

For more than 50 years, GCX Healthcare Solutions and subsidiaries, like Jaco, Inc., have been empowering clinicians to achieve optimal patient outcomes. GCX offers hospitals, medical equipment distributors, and medical device manufacturers safe, comfortable, and ergonomic mounting and mobility solutions that support proper usage of medical and IT devices in a variety of environments. As an ISO 13485 and FDA-registered company, GCX has an excellent track record for design innovation, product quality, and customer service.

## WE WORK EVERYWHERE YOU DO

GCX expertise extends to virtually every area of the hospital.

- Anesthesia
- Endoscopy
- Cardiology
- Neurology
- Computer (IT) Equipment
- Patient Monitoring
- Otolaryngology
- Surgical Navigation
- Ventilation
- Ultrasound
- Urology

OEM Services  
CUSTOM MOUNTING SOLUTIONS

# LEVERAGE THE EXPERIENCE OF THE WORLDWIDE LEADER IN MEDICAL DEVICE MOUNTING SOLUTIONS.

For over 45 years, GCX has worked with many OEM partners in close, ongoing relationships. With our extensive resources and expertise, we offer a full range of design and manufacturing capabilities. Solutions include standard products, custom configurations, or a hybrid solution where standard products are combined with custom elements.

We design and manufacture everything under our ISO 13485 certified quality system.

## CAPABILITIES

### DESIGN: FROM USABILITY TO AESTHETICS

At GCX, we design mounting solutions that enhance the usability of medical devices by making their full functionality accessible—simply, safely, and comfortably. The result is productive caregivers and improved patient care. We can support your device branding and design by aligning your specifications with a complete custom solution, or by combining brand-supporting details with existing GCX components.

### PRODUCT DEVELOPMENT SERVICES

Involve our engineering team early to create the right product at the lowest cost. GCX can help get your device to market quickly with our extensive development services:

- Industrial design
- Mechanical design
- Rapid prototyping: in-house FDM and complex-surface machining
- Engineering documentation
- Testing to recognized standards
- Manufacturing and tool design
- Technical writing
- Requirements development
- Label design
- Packaging design and testing
- Marketing materials

### MANUFACTURING

At GCX, we control costs by utilizing a full range of production processes across a global manufacturing organization. Multiple facilities are specialized for development and fast ramp-up, flexible 'high mix', and high volume production. Our ISO 13485 certified quality management system ensures medical-grade quality throughout the production lifecycle.

- CNC milling and turning
- Sheet metal fabrication
- Aluminum extruding
- Injection molding
- Die casting
- Plastic forming
- Finishing
- Structural foam

### STATE-OF-THE-ART TESTING FACILITY

Our product teams ensure that GCX mounting solutions are tested through rigorous safety and reliability testing in accordance with GCX expertise and applicable industry standards, such as IEC 60601-1.

### LOCAL ASSEMBLY, DISTRIBUTION, AND LOGISTICAL SUPPORT

GCX controls costs and improves logistics support through decentralized assembly and distribution facilities. Located in Europe, Asia, and across the United States this operations network enables us to:

- Minimize your inventory through drop ship or JIT replenishment.
- Reduce shipping costs by using regular container shipping between GCX locations and by performing final assembly and packing locally.
- Improve responsiveness by placing inventory where it is most valuable—near your customer.
- Provide local service and support.

GCX's expertise and experience makes them the ideal long-term OEM partner.
