

Jaco EVO Wall Arms

Point-of-care wall arm workstations featuring breakthrough Jaco EVO design innovations

Built to last from aircraft-grade metal

with a non-porous antimicrobial powder coat that stands up to medical-grade chemical and UV sterilization.

Comfort Glide Lift Technology™

for smooth, instant, effortless adjustment to comfortable working height

Ships fully assembled and cable-ready

for the fastest installation and time-to-value

Upgrade technology without replacing your wall arms.

EVO Wall Arms adapt easily to support LCDs and all-in-ones in wide range of weights, protecting your investment.

Shown: EVO WA-JT with Combination Keyboard Case/Worksurface

EVO's ergonomic nurse comfort, maintenance-free reliability and proven sustained value – now in a family of reinvented wall arm workstations.

EVO WA-OT-JT:
Provides full range of height, screen and keyboard adjustments; folds to just 7.5" from the wall.

EVO WA-JT
Adds a protective keyboard case that doubles as a large 20" x 9" antimicrobial worksurface.

Common Benefits

Adjusts effortlessly for comfortable use

Comfort Glide Lift Technology provides smooth, silent, instant height adjustment

Change your hardware, not your wall arm

Adjusts easily to support LCDs and all-in-one PCs up to 24" (diagonal); supports standard and extra-large keyboards

Engage patients from more angles

Full range of keyboard and display adjustments enable comfortable patient engagement from multiple positions

Exceptional stability

A single, large, easy-to-turn lock knob secures the wall arm firmly at the desired height

Extended models available

Adds 15" to radius of motion for more flexibility and closer patient interaction

Built to last

Durable lightweight aluminum and steel construction; 10-year warranty

Superior infection control

Non-porous antimicrobial powder coat finish stands up to medical-grade chemical and UV disinfection

Clean cable management

Prevents cable damage and simplifies cleaning

Ships fully assembled and cable-ready

Deploys quickly and easily for rapid time-to-value

Mouse protection

Automatically catches mouse when keyboard is folded
